

SLW CO2 Laser Tube

1. Technical Parameter of SLW CO2 Laser Tube
2. Introduction of 220W & Photos
3. Introduction of 300W & Photos
4. Introduction of 500W & Photos
5. Introduction of 600W & Photos

1 .Technical Parameter of SLW Laser Tube

Model	Underlying Power	Max.Power	L*W*H	Weight	Quantity of Laser Power Supply	Chiller Model (It is important to note that the lift must be 25 meters or more.)
SLW--I	220W	260W	1600*246*147mm	13kg	2 sets	CW5200
SLW--II	300W	350W	1810*246*147mm	17kg	2 sets	CW5200 (Model 6000 is recommended for hot areas)
SLW--III	500W	530W	1870*354*147mm	24kg	3sets	CW6000
SLW--IV	600W	700W	1810*370*150mm	32kg	4sets	CW6200

2.Introduction of 220W CO2 Laser Tube & Photos

1) Introduction

SLW 220W CO2 laser is a new product developed by Wuhan SILVER Laser Technology Company in 2019. It is a medium-power CO2 laser tube. After many aspects of testing and improvement, the technology is mature and the product is stable. The advantages are small size and light weight, with a length of only 160cm and a weight of only 13kg.

Mainly suitable for laser cutting, acrylic, thin steel plates, and thicker leather materials.

3. Introduction of 300W & Photos

1) Introduction

SLW 300W CO2 laser is a mature product launched by Wuhan SILVER Laser Technology Company as early as 2015. After years of testing and improvement, the technology has become very mature and the quality is stable. The advantages are small size and light weight, with a length of only 181cm and a weight of only 17kg. Mainly suitable for cutting metal and non-metal mixed cutting, acrylic, knife template, density board, carbon steel, stainless steel and other materials.

4. Introduction of 500W CO2 Laser Tube & Photos

1) Introduction

In 2018, after three years of R&D testing, 400W has been upgraded to 500W, which is a qualitative leap in the industry. This product has higher output power while maintaining the same volume, which fundamentally improves cutting efficiency. Mainly suitable for cutting metal and non-metal mixed cutting, acrylic, knife template, density board, carbon steel, stainless steel, carbon fiber and other polymer materials.

5. Introduction of 600W & Photos

1) Introduction

SLW 600W CO2 laser is a glass laser tube that can reach the highest power output among domestic sealed CO2 lasers, and the highest power can reach more than 700W. Compared with the above models of laser tubes, this product has higher power, which fundamentally saves working time and improves work efficiency. Mainly suitable for cutting metal and non-metal mixed cutting, acrylic, knife template, density board, carbon steel, stainless steel, carbon fiber and other polymer materials.
